Degree	Department	University	Year
Undergraduate	Material Science and Engineering.	Erciyes University	2017
Postgraduate	Mechanical Engineer	İstanbul Aydın University	2020
PhD.	Materials Science and Nanotechnology Engineering(English)	Yeditepe University	2020-

Master's Thesis:

Research of The Mechanical Properties and Impact Toughness Of Carbon – Kelar Hybrid Composites With Nanoalumina in Different Layers

Projects

Cylinder-Piston Design and Alternative Material Selection for Cars

The Selection Of Material to Use in Spoiler Desing by Multi-Criteria Decision Method

Carbon Mold Alternative Production Used in Glass Production

Drug Delivery Systems

The Wear Resistance of Fiber Reinforced Thermoset Composites with Organic and Inorganic Additives – Review Article

Papers presented at international scientific meetings and published in proceedings:

The Selection Of Material to Use in Spoiler Desing by Multi-Criteria Decision Method

Research of The Mechanical Properties and Impact Toughness Of Carbon – Kelar Hybrid Composites With Nanoalumina in Different Layers
