

Özlem Merve Cansever

ozlemcansever@aydin.edu.tr

EDUCATION

- 08/2021 – Present Neuroscience, *Ph.D.* - *Yeditepe University*
- 09/2017 – 09/2020 Cognitive Neuropsychology, *M.Sc.* - *Bahçeşehir University*
Thesis: "Face recognition and Metamemory: Feeling of knowing judgments in response to familiar faces."
- 08/2010 – 05/2014 Psychology, *B.A.* - *Yeditepe University*

WORK EXPERIENCE

- 04/2020 – Present Research Assistant - *Psychology Department, İstanbul Aydın University*
I am actively responsible for both academic and administrative processes in the department.
- 09/2018 – 12/2019 Neuropsychologist - *Neuropsychology Lab, Behavioral Neurology and Movement Disorders Department, İstanbul University Çapa Hospital*
I took part in the evaluation of patients (Parkinson, Alzheimer's, Hydrocephalus, Epilepsy) who came to the neurology outpatient clinic with neuropsychological tools. To evaluate global cognitive functions, I have applied many tests such as memory tests for both verbal, visual, and working memories, the WCST, the Benton Face Recognition Test, line direction determination test, and the Boston naming test. I reported the results and presented the cases to the neurologists.
- 06/2018 – 09/2018 Intern Neuropsychologist - *Neurology Polyclinic, Tekirdağ Namık Kemal Hospital*
I took part in the neuropsychological assessment of migraine and MS patients who came to the neurology outpatient clinic. I reported the results of the assessment and presented them.

TEACHING EXPERIENCE

- 03/2021 – 05/2021 Neuropsychology Training Level I - *Psychology Application and Research Center (PUAM), Bahçeşehir University*

It was a training in which basic concepts are discussed in the fields of neuropsychology and neuropsychological evaluation. In this training, which we conducted with my colleague Berna Güler, who is a cognitive neuropsychologist like me, the senior students of the Psychology Department at Bahçeşehir University had the chance to learn the neuropsychological profiles of neurodegenerative diseases such as Alzheimer's and Parkinson's. In addition to theoretical information, the training was enriched with case presentations. We provided introductory training on the application and interpretation of the results of tests such as Öktem Verbal Memory Test, Boston Naming Test, Benton Face Recognition Test, Line Direction Determination Test, and Clock Drawing Test.

- 02/2021 – 06/2021 PSİ208 Cognitive Psychology - *Psychology Department, Mardin Artuklu University*

PUBLICATION

- Cansever ÖM, Sav A. (2022). Virtual Autopsy-Virtopsy (Joint Working Processes of Postmortem Radiology and Pathology). Kutlu AK, editör. Otopsinin Tıp Eğitiminde ve Patoloji Eğitimindeki Yeri. 1. Baskı. Ankara: *Türkiye Klinikleri*; p.54-60. Online ISBN: 978-625-401-791-9
